we apologize for the inconvenience and hope to have it up and running again soon Preterm Babies, Fetal Patients, and Childbearing Choices (Basic Bioethics):

The United States has one of the highest rates of premature birth of any industrialized nation 11.5 nearly twice the rate of many European countries In this book John Lantos and Diane Lauderdale examine why the rate of preterm birth in the United States remains high even though more women have access to prenatal care now than three decades ago They also analyze a puzzling paradox why even as the rate of preterm birth rose through the 1990s and early 2000s With engaging prose and scientific rigor Lantos and Lauderdale upend conventional wisdom about what is right and wrong with modern maternity care and point us compellingly toward a new paradigm for evaluating and advancing the health of pregnant women
