By Stefan Timmermans, Mara Buchbinder : Saving Babies?: The Consequences of Newborn Genetic Screening (Fieldwork Encounters and Discoveries) I celebrate myself and sing myself and what I assume you shall assume for every atom belonging to me as good belongs to you I loafe and invite my soul even more account options sign in; search settings Saving Babies?: The Consequences of Newborn Genetic Screening (Fieldwork Encounters and Discoveries):

2 of 3 review helpful A Very Important Contribution By Greg This is an excellent fascinating work in the sociology of medicine Timmermans has studied the unforeseen consequences of the massive expansion of mandatory genetic screening for newborns While well intentioned the policy was not driven by medical imperative but by parent advocates and the politicians representing them In many cases the consequences of screeni It has been close to six decades since Watson and Crick discovered the structure of DNA and more than ten years since the human genome was decoded Today through the collection and analysis of a small blood sample every baby born in the United States is screened for more than fifty genetic disorders Though the early detection of these abnormalities can potentially save lives the test also has a high percentage of false positives mdash inaccurate results that Smart humane and beautifully written Saving Babies is respectful but critical of clinicians parents and policymakers as it vividly connects the reader to the human tragedies on the page nbsp Without being maudlin Stefan Timmermans and Mara
