By Bradley Yoder MD, Haresh Kirpalani BM FRCP(Lond) MSc : Non-Invasive Ventilation, An Issue of Clinics in Perinatology, 1e (The Clinics: Internal Medicine) Non-Invasive Ventilation, An Issue of Clinics in Perinatology, 1e (The Clinics: Internal Medicine):

Preterm birth interrupts the normal developmental progression of most organs particularly when birth occurs at the lowest level of viability An immediate task is to successfully transition to a post natal life without a placental circulation To do this demands careful management of the cardiorespiratory systems To best help the fragile preterm infant at this demanding time care givers must remember two most pressing goals These are first to maintain adequacy of gas
