identification Catalog of Teratogenic Agents:

The most comprehensive one volume guide of its kind this standard reference work has been newly revised and

expanded to present information on teratogenic agents in a ready reference format The tenth edition includes nearly 400 newly listed agents approximately half of which are developmental genes that cause syndromes or congenital defects It also reviews recent literature on clinical and experimental teratology including important Japanese literature not easily A well written and authoritative resource of valuable information Veterinary and Human Toxicology It is good news that Johns Hopkins University Press continues to support frequent new editions of this classic re
