By Lucy J. Robertson : Giardia as a Foodborne Pathogen (SpringerBriefs in Food, Health, and Nutrition)

Giardia as a Foodborne Pathogen (SpringerBriefs in Food, Health, and Nutrition):

Although widely recognized as an important waterborne pathogen Giardia duodenalis can also be transmitted by contamination of food The same properties of this protozoan parasite that mean that water is an excellent transmission vehicle are also important for foodborne transmission These include the low infective dose the high number of cysts that are excreted and the robustness of these transmission stages However many more outbreaks of waterborne n
