By Undurti N. Das : A Perinatal Strategy For Preventing Adult Disease: The Role Of Long-Chain Polyunsaturated Fatty Acids A Perinatal Strategy For Preventing Adult Disease: The Role Of Long-Chain Polyunsaturated Fatty Acids:

This book proposes that fetal growth retardation and low grade systemic inflammation can be prevented by perinatal supplementation of long chain polyunsaturated fatty acids LCPUFAs Evidence for this hypothesis is presented and discussed in detail along with possible mechanisms by which these substances produce beneficial actions Finally it is suggested that provision of adequate amounts of LCPUFAs during the perinatal period
