From the files of NeoReviews comes this collection of Perinatal Profiles chosen to provide a glimpse into the lives of the movers and shakers in neonatal perinatal medicine. Many of the profiles in this collection written by the students of these pioneers who have gone on to become key NPM innovators themselves. They provide rare insight into the personalities of their mentors and the development of NPM. This unique historical book really has no comparisons. This unique collection gives readers much more insight and perspective about the people who formed the basis of the speciality and on whose shoulders we stand. Jay P Goldsmith
