From CABI : Maternal and Perinatal Health in Developing Countries background the world health organization who estimates that in 2005 over 500000 women died from pregnancy and birth related causes1 a woman in a developing there are an estimated 4 million neonatal deaths and 500000 maternal deaths worldwide each year 12 the vast majority of these deaths occur in developing countries Maternal and Perinatal Health in Developing Countries:

0 of 0 review helpful Five Stars By Peter This book is exactly what I was looking for The promotion of maternal

health and mortality reduction is of worldwide importance and constitutes a vital part of the UN Millennium Development Goals The highest maternal mortality rates are in developing countries where global and regional initiatives are needed to improve the systems and practices involved in maternal care and medical access Taking a practical policy approach this book covers the background and concepts underlying efforts to improve maternal and This book is the first of its kind and the need for it has existed for a long time It will serve as a useful textbook for students of public health who are interested in maternal and perinatal health and mortality Judith A Fortney PhD
