By Paul Govaert, Linda S. DeVries : An Atlas of Neonatal Brain Sonography (Clinics in Developmental Medicine) original article a multicenter randomized trial of treatment for mild gestational diabetes mark b landon md catherine y spong md elizabeth thom phd pubmed comprises more than 27 million citations for biomedical literature from medline life science journals and online books citations may include links to full An Atlas of Neonatal Brain

Sonography (Clinics in Developmental Medicine):

This is a comprehensive atlas of the brain of the newborn infant as depicted by high frequency ultrasound For ease of use the volume is arranged into distinct parts Coverage begins with echo anatomy then proceeds through congenital anomalies in utero acquired brain damage and perinatal injury Where relevant corresponding CT or MRI pictures are provided Additional topics covered include Doppler imaging and the measurement of echodensity Throughout the work This Atlas of Neonatal Brain Sonography is probably one of the most up to date and comprehensive guidebooks on this subject which I am sure will become a meaningful reference for pediatricians neurologists neurosurgeons intensivists radiologists and all
