**From Springer : Surfactant Replacement Therapy: in Neonatal and Adult Respiratory Distress Syndrome**  
respiratory distress syndrome is caused by pulmonary surfactant deficiency in the lungs of neonates most commonly in those born at 37 wk gestation risk increases surfactant definition surfactant is a complex naturally occurring substance made of six lipids fats and four proteins that is produced in the lungs it can also be Surfactant Replacement Therapy:

in Neonatal and Adult Respiratory Distress Syndrome:

I am very happy and honoured to have so many famous contributors from around the world presenting their knowledge and experience in this book including Dr Rufer who as early as 1967 attempted to improve the pressure volume curve of a child dying from RDS using dried surfactant from dogs Drs Enhorn Shyng and Robertson who were the first to treat rabbit fetuses with surfactant replacement and impressively demonstrated that surfactant improved lung mechanics
