By Harold Kalter : Of Diabetic Mothers and Their Babies: An Examination of the Impact of Maternal Diabetes on Offspring, Prenatal Development, and Survival methodologic issues breastfeeding results in improved infant and maternal health outcomes in both the industrialized and developing world major methodologic issues maternal micronutrient requirements during lactation breast feeding confers health benefits to the child as well as the mother breast milk is the ideal source of Of Diabetic Mothers and Their Babies: An Examination of the Impact of Maternal Diabetes on Offspring, Prenatal Development, and Survival:

In this book Harold Kalter challenges the belief that the babies of women with insulin dependent diabetes are congenitally malformed more often than babies of nondiabetic women He traces the origin of this idea to a survey of births to diabetic women in a Danish hospital reported in 1964 and follows the trail of literature to the present Kalter points out the two errors most responsible for the faulty theory a loose definition of the term malformation and the use of mi This monograph attacks the widely held belief that maternal diabetes is teratogenic i e that it disturbs the development of the embryo Rarely has an iconoclastic treatment of a subject been so thoroughly researched and documented
